### ▶ Baptistry Heaters & Accessories

Immersion, Circulating, Electric and Gas/LP

Our complete line of baptistry heaters and accessories offers a wide array of models to choose from. For more information, please visit us online at [www.baptistryheaters.com](http://www.baptistryheaters.com).

## Immersion Heater IMER-6-42 (6KW)

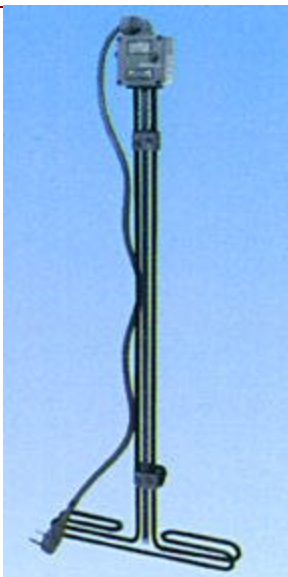

### Our best value!

Our 6KW Immersion Heater is perfect for portable baptisteries and smaller baptisteries.

#### Available in 120V or 240V Options

### Designed for Low Cost Installation

Our Immersion heater is the perfect choice when it comes to value, low cost and ease of installing. Features include a vapor-proof thermostat control with a temperature range of 55°F to 115°F. The unit also has a Hi-Limit cut out switch at 125°F (±4°). Also our Immersion Unit uses a Pilot light and on-off switch that indicates desired temperature when reached and breaks circuit when element is not in use. This helps to save both electricity and money!

Completely automatic and portable - just plug in 42" Power Cord and operate.

No cutting or damage to your present container.

Although portable - your container may be cleaned without removing unit.

Unit can be suspended in middle, end or side of container.

No contractors required on standard IMER-6-42 Models

The IMER-6-42 (6KW) will heat 60 GPH (40° R). A 750 to 1,000 gallon Baptistry can be heated in 13 to 17 hours, or one-half this time 20 degree rise in temperature.

Heater can be operated on 120 volts (on the 240v plug system), but power will be reduced to 1.5KW and will heat 15 GPH (40° R) or 30 GPH (20° R)

1 year manufactures warranty

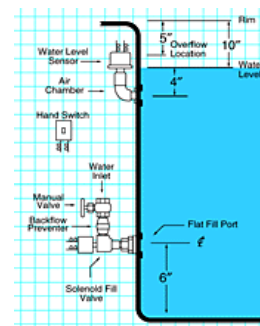

UL Listed under File # E76690
